May Lucky Rakgama

Software Developer

As Software Developer, my goal is to contribute my technical skills, creativity, and enthusiasm to a team that fosters growth and innovation. I am eager to collaborate on exciting projects that will challenge me to grow both professionally and personally. I am confident that my dedication to excellence and passion for software development will make me a valuable asset to any organization.

Education

On The Ball College

Jan 2021 — Nov 2022

146 credits

System Development

is a nationally recognized certification that demonstrates proficiency in various aspects of system development and software engineering. This qualification equips individuals with the skills and knowledge necessary to design, develop, and maintain software applications and systems effectively and encompasses the following key competencies:

Software Development: Proficiency in various programming languages and tools for designing, coding, and testing software applications.
Database Management: Understanding of database design and management, including data modeling and SQL queries.
System Analysis and Design: Ability to analyze business requirements and design efficient and scalable software systems.
Software Testing: Expertise in quality assurance and software testing methodologies to ensure the reliability and functionality of developed systems.
Project Management: Knowledge of project management principles and methodologies to deliver software projects on time and within budget.
Problem Solving: Strong problem-solving skills to identify and resolve technical issues in software development processes.
Communication: Effective communication skills to collaborate with cross-functional teams and stakeholders throughout the software development lifecycle.

Graduate Institute of Finanacial Sciences &SANTAM learning Academy

Mar 2021 — Nov 2022

138 Credits

Client Engagement and Quality Administrator (Short term Insurance)

is a nationally recognized qualification in the insurance industry. It is designed to equip professionals with the essential knowledge and skills required to excel in the field of short-term insurance, including various types of general insurance policies such as motor, property, liability, and personal lines

Key Areas of Study:

Principles of Short-Term Insurance: Understanding the fundamentals of short-term insurance, including risk assessment, underwriting principles, and policy administration.
Legal and Regulatory Framework: Comprehending the relevant laws and regulations governing the insurance industry and ensuring compliance with industry standards.
Insurance Products and Services: Familiarity with various short-term insurance products, their features, and their applicability to different customer needs.
Claims Handling and Management: Developing expertise in efficiently managing and processing insurance claims.
Customer Service and Communication: Gaining essential communication skills to interact with clients, provide appropriate insurance advice, and handle inquiries effectively.

St Pauls High School

Nov 2012 — Nov 2016

32 GPA Score

Grade 12 (Matric)

Grade 12 typically includes a combination of core subjects and electives. Core subjects commonly consist of mathematics, science, social studies, language arts, and a second language (e.g., English, French, Spanish, etc.). Electives can vary widely and might include subjects like fine arts, computer science, physical education, etc.

Work Experience

Meadowridge (Cape Town)

Mar 2022 — May 2023

SpaceSoft

As a Junior Software Developer, I played a crucial role in the development and maintenance of various software applications. I worked closely with senior developers and took part in the following tasks:

Code Development: I actively contributed to writing, testing, and debugging code for new features and improvements. I followed best coding practices and adhered to the project's coding standards.
Bug Fixes: I investigated and addressed software issues and bugs reported by users or identified during testing. I meticulously traced the source of the problem and provided effective solutions.
Feature Implementation: I participated in designing and implementing new features and functionalities based on the project requirements. I collaborated with the team to ensure seamless integration with existing code.
Code Reviews: I engaged in code reviews to improve code quality, share knowledge, and learn from experienced developers. I provided constructive feedback to my peers and actively incorporated suggestions from others.
Testing and Quality Assurance: I wrote and executed test cases to verify the correctness of the software. I made sure that the software was robust and delivered a high-quality user experience.
Documentation: I contributed to creating and maintaining technical documentation, including code comments, user guides, and project-related documents. Clear documentation was vital for seamless collaboration among team members.
Learning and Growth: I continuously expanded my knowledge and skills by keeping up with the latest trends and technologies in the software development industry. I attended workshops and participated in online courses to improve my expertise.
Service Desk:

As a member of the Service Desk team, my role was focused on providing excellent customer support and ensuring the smooth functioning of IT services. I was responsible for handling various tasks and interactions, including:

User Support: I offered technical assistance and troubleshooting to end-users who encountered problems with software applications, hardware, or network connectivity. I patiently listened to their issues and provided prompt solutions.
Ticket Management: I diligently managed support tickets using the ticketing system. I logged, categorized, and prioritized incoming requests to ensure efficient resolution and timely communication with users.
Basic Technical Issues: I resolved basic technical problems, such as password resets, account setups, and software installations. For more complex issues, I escalated them to higher-level support teams while maintaining regular updates to users.
Knowledge Base: I actively contributed to the knowledge base by creating and updating articles to help users find solutions to common problems on their own. This initiative aimed to reduce ticket volumes and empower users with self-help resources.
Service Monitoring: I monitored IT services and systems for any signs of disruption or irregularities. In case of outages or incidents, I promptly informed the relevant teams for swift resolution.
Communication: I ensured clear and courteous communication with users, both in writing and verbally. I empathized with their concerns and maintained a professional demeanor throughout interactions.
Continuous Improvement: I actively participated in team meetings to share insights and suggest improvements to enhance the efficiency and effectiveness of the Service Desk operations.
As a member of both the Junior Software Developer and Service Desk teams, I embraced challenges and opportunities for growth, contributing to the success of the projects and delivering exceptional support to end-users.

Tyger Valley (Cape Town)

Mar 2020 — Mar 2021

SANTAM (Client Engagement)

played a crucial role in assisting clients with their insurance inquiries and concerns. I was the primary point of contact for customers, ensuring that their needs were addressed promptly and professionally. Some of the key tasks and responsibilities I handled include:

Responding to Customer Queries: I promptly answered incoming calls, emails, and messages from clients, providing them with accurate information about insurance policies, coverage options, and premium rates. I strived to resolve their issues and concerns on the spot, ensuring their satisfaction.
Processing Policy Requests: I assisted customers with policy applications, modifications, and cancellations. I carefully reviewed their requests and ensured that all necessary documentation was complete, forwarding it to the appropriate department for processing.
Handling Claims: Whenever a customer needed to file an insurance claim, I guided them through the process, gathering essential details, and explaining the next steps. I empathetically addressed their concerns and provided reassurance during stressful situations.
Technical Support: As an IT-related insurance selector, I was well-versed in the online platform used by customers to access their policies. I assisted clients with technical issues, login problems, and navigation difficulties to ensure they could easily manage their accounts.
Upselling and Cross-Selling: Whenever suitable, I offered customers additional coverage options that aligned with their needs. I explained the benefits of these add-ons and helped clients make informed decisions about their insurance coverage.

West End Avenue (Centurion)

Mar 2021 — Feb 2022

SANTAM (Quality Controll)

my role focused on ensuring the highest standards of service delivery and adherence to regulatory requirements. My contributions to the team included:

Monitoring Customer Interactions: I regularly reviewed interactions between Customer Service Agents and clients, whether through recorded calls, chat transcripts, or email exchanges. I meticulously analyzed these interactions to assess the quality of service provided.
Quality Assurance Checks: I conducted thorough quality assurance checks to evaluate whether the Customer Service Agents adhered to company policies and procedures while assisting customers. I provided feedback and coaching to agents to enhance their performance.
Identifying Training Needs: Based on my evaluations, I identified areas where Customer Service Agents required additional training or support. I collaborated with team leaders and trainers to design relevant training programs to improve the team's skills and knowledge.
Compliance Monitoring: I ensured that all customer interactions and processes aligned with regulatory requirements and industry standards. I worked closely with compliance teams to address any potential issues promptly.
Reporting and Analysis: I prepared detailed reports on customer service performance, highlighting key metrics and areas for improvement. I presented these reports to management, providing valuable insights to enhance overall customer satisfaction.
Process Improvement: I actively contributed to the continuous improvement of customer service processes, suggesting ideas and implementing changes to enhance efficiency and customer experience.

Projects

LIMS OPTIMASATION (Spacesoft)

Actively participated in an LIMS (Laboratory Information Management System) Optimization project as a student contributor.
Applied SQL (Structured Query Language) skills to enhance the functionality and efficiency of the LIMS database.
Collaborated with the project team to analyze database requirements and develop optimized SQL queries.
Assisted in data modeling and database design to improve data organization and retrieval.
Contributed to the development and implementation of web-based interfaces for LIMS users.
Utilized web development technologies, such as HTML, CSS, and JavaScript, to enhance the user experience and interface design.
Worked closely with senior developers to integrate the web interfaces with the LIMS backend.
Conducted testing and debugging of the web applications to ensure smooth functionality and user-friendly navigation.
Documented project progress, methodologies, and outcomes, providing valuable insights for future LIMS optimization initiatives.
Demonstrated strong problem-solving skills and the ability to adapt to evolving project requirements.
Effectively collaborated with the project team, communicating ideas and contributing to project discussions

EQMS Web App Maintance(Equipment Quality Management Sytem)

enhance and optimize the existing EQMS to ensure efficient management, tracking, and maintenance of equipment across the organization. The EQMS is a critical system that plays a vital role in maintaining equipment integrity, ensuring operational efficiency, and adhering to regulatory standards. This project aims to improve the system's functionality, usability, and scalability, while also incorporating new features to meet the evolving needs of the organization.
